

AWS Sagemaker

Problem Statement : Auto Insurance Fraud

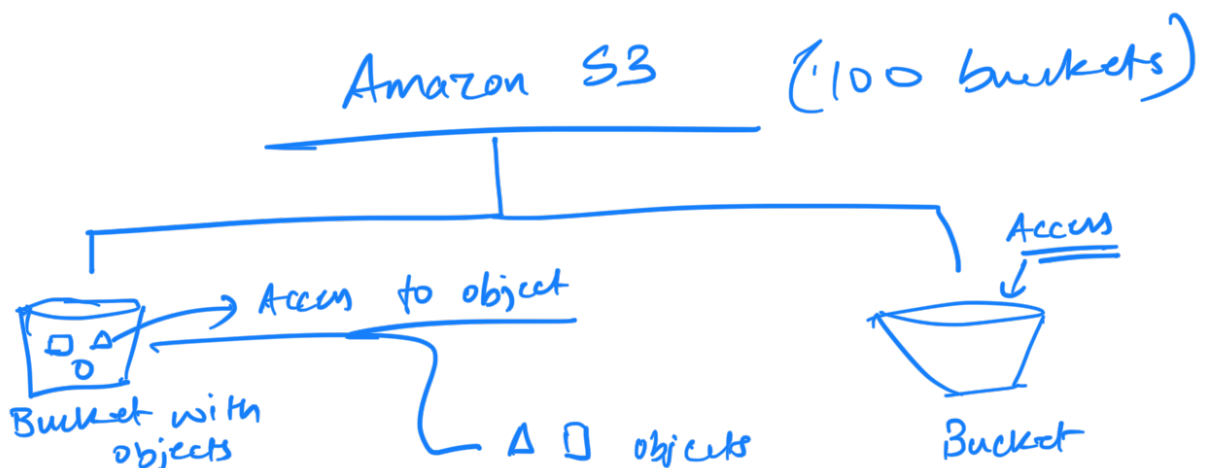

Amazon S3 → Simple Storage Service

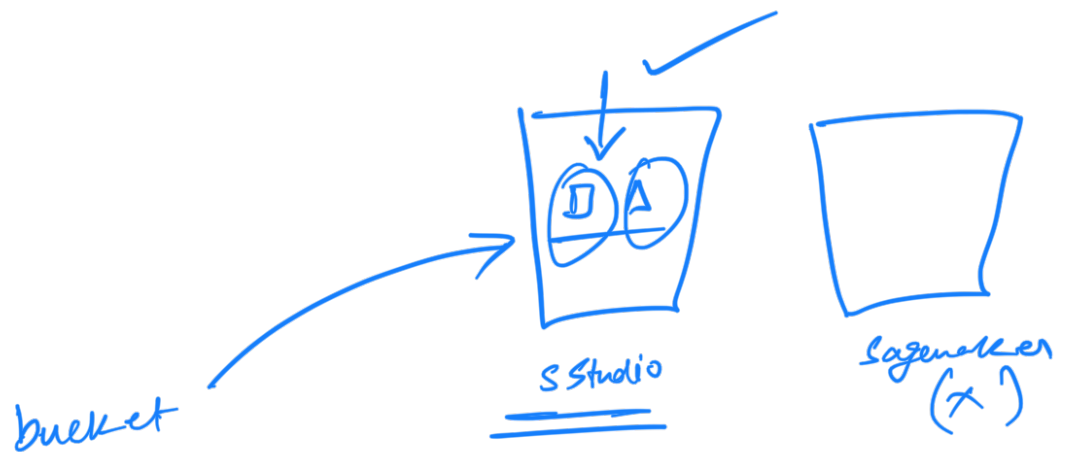

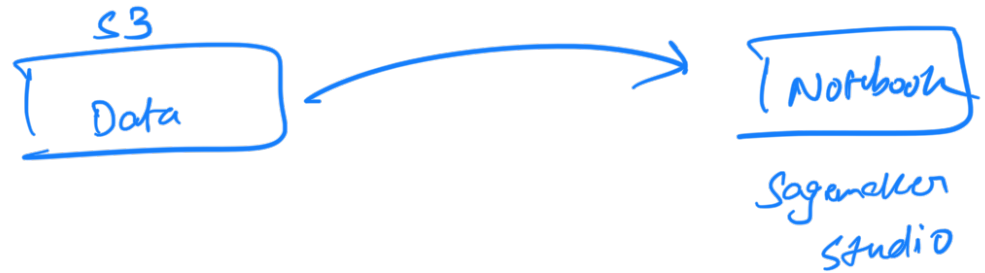

Scalable ✓
Flexible ✓

STB

S3 stores Data → Objects inside a bucket

1. Sagemaker Domain Setup
2. Upload Data to S3 bucket
3. Start the notebook.
- 4.

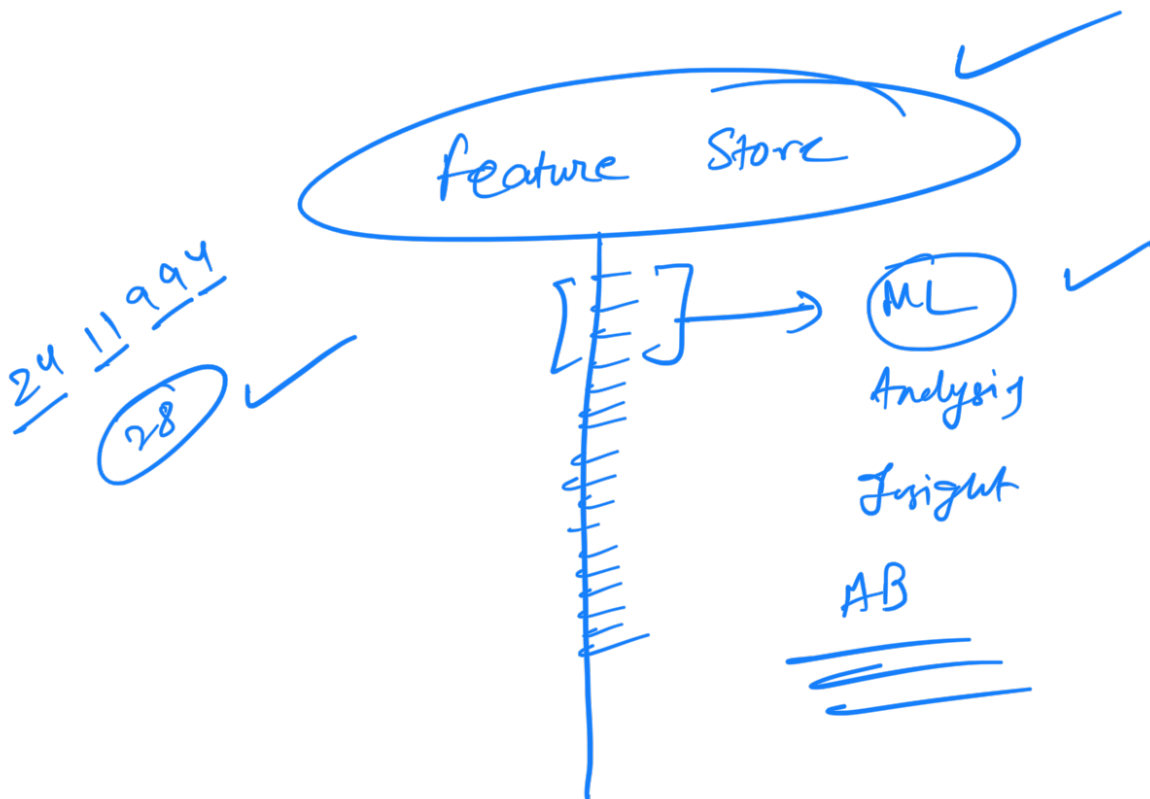

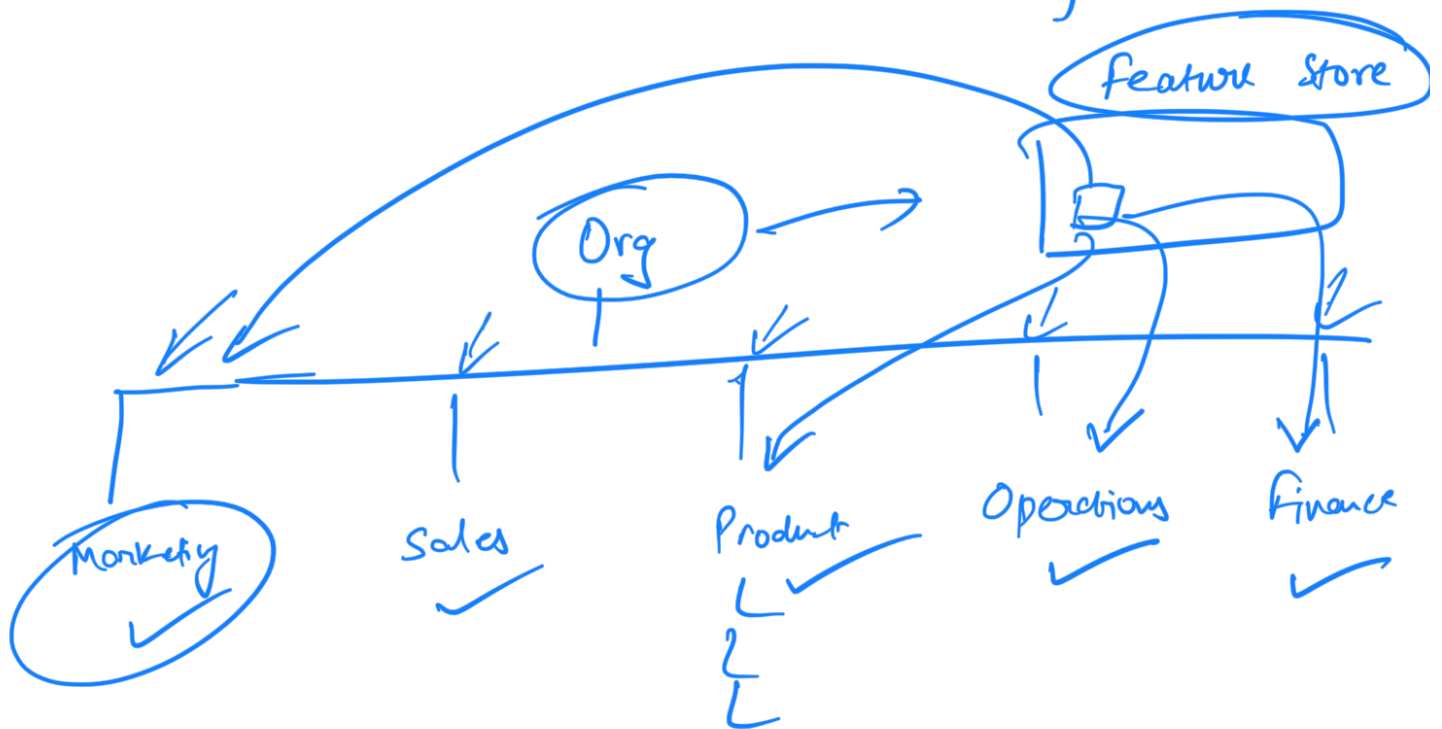

Data Preprocessing & Wrangling

Data Wrangler (300+ transformations)

Data preparation workflow,
 Data selection
 cleanse

Exploration
& Visualize

Will start at 9:05!

... .. sure your AWS labs are running.

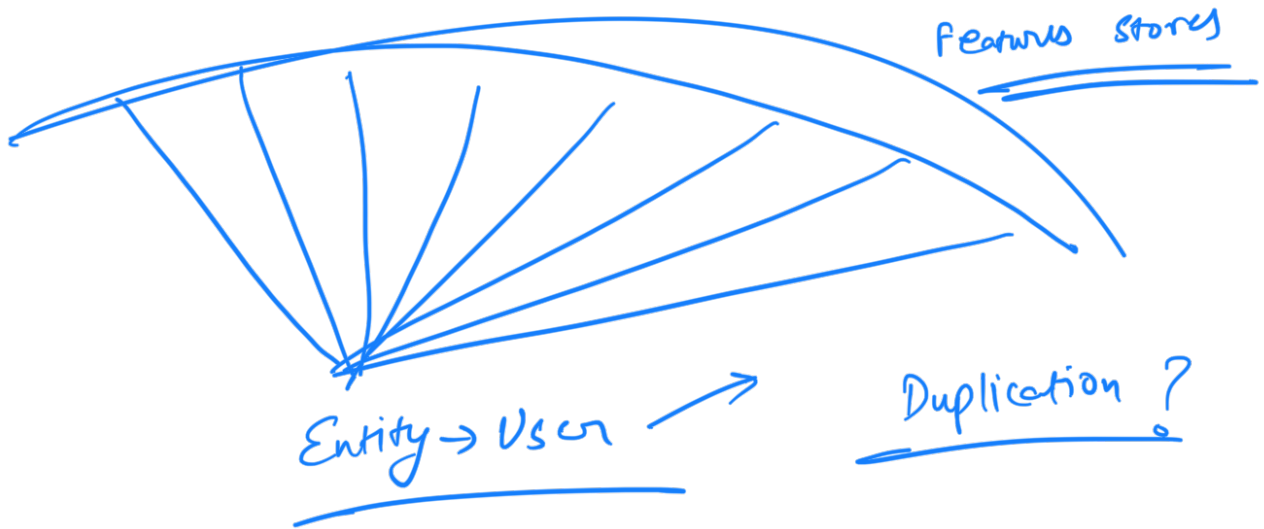

Make sure

U

With sagemaker domain created.

Swiggy → Entity → User ✓

When do we need FS?

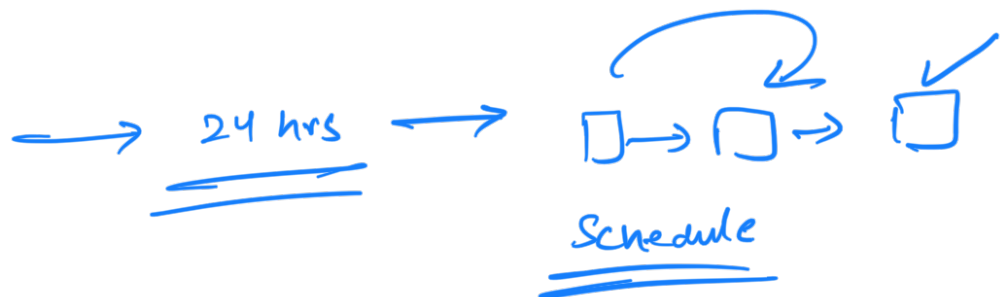

↳ Hard to manage & maintain

↳ Not needed for small-scale companies.

↳ If the transformations are simple & can be done within the model, you wouldn't need an FS.

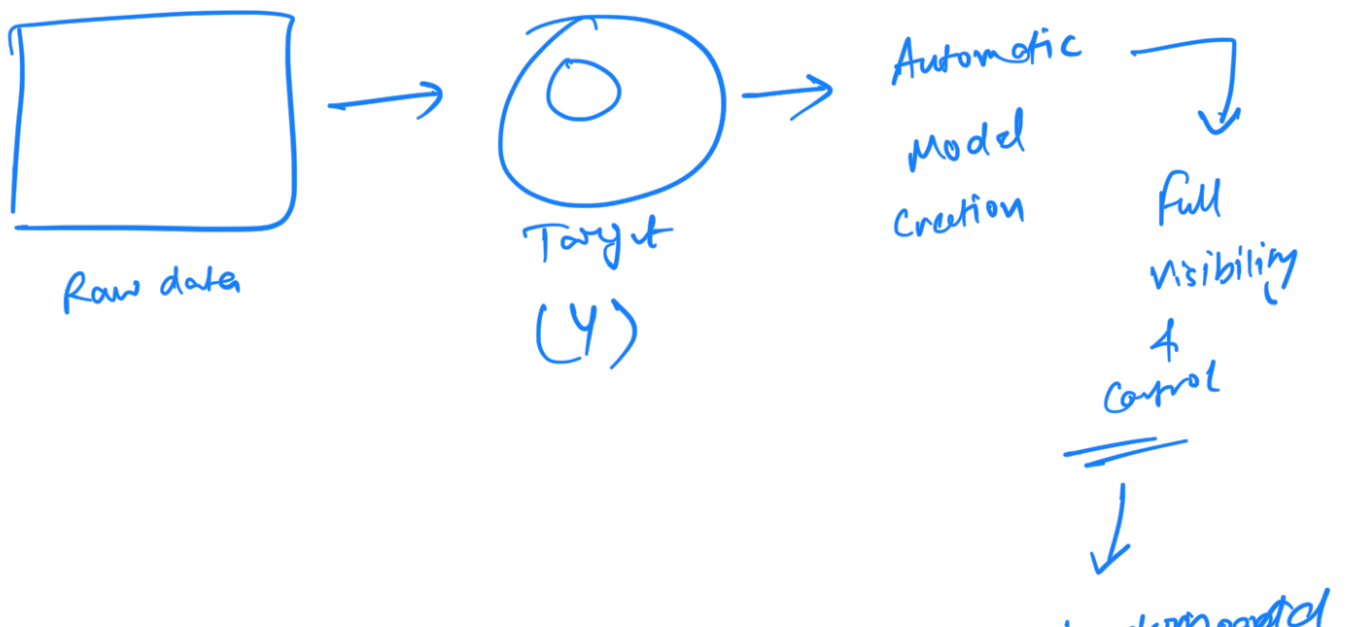

Feature Stores

↳ feature Groups — A collection

Sagemaker Autopilot / AutoML

- ↳ Automatically build, train, tune
- ↳ visibility & control
