

CI / CD

Continuous Integration / Continuous Delivery

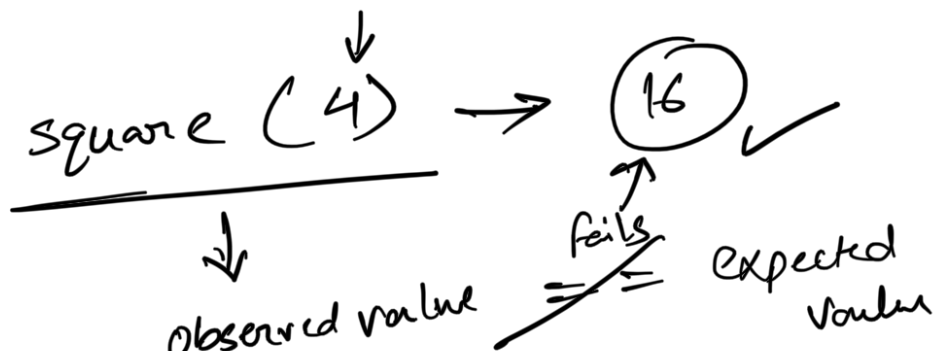

CI → Integrating all code changes into the main branch of a shared source code repo.

→ Automatically tested
→ Commit → Build

Unit Testing

pass

→ Pytest runs all the python(.py) files
where the name is prepensible with
test_

test-(*).py ←

test* → (X) treated as tests

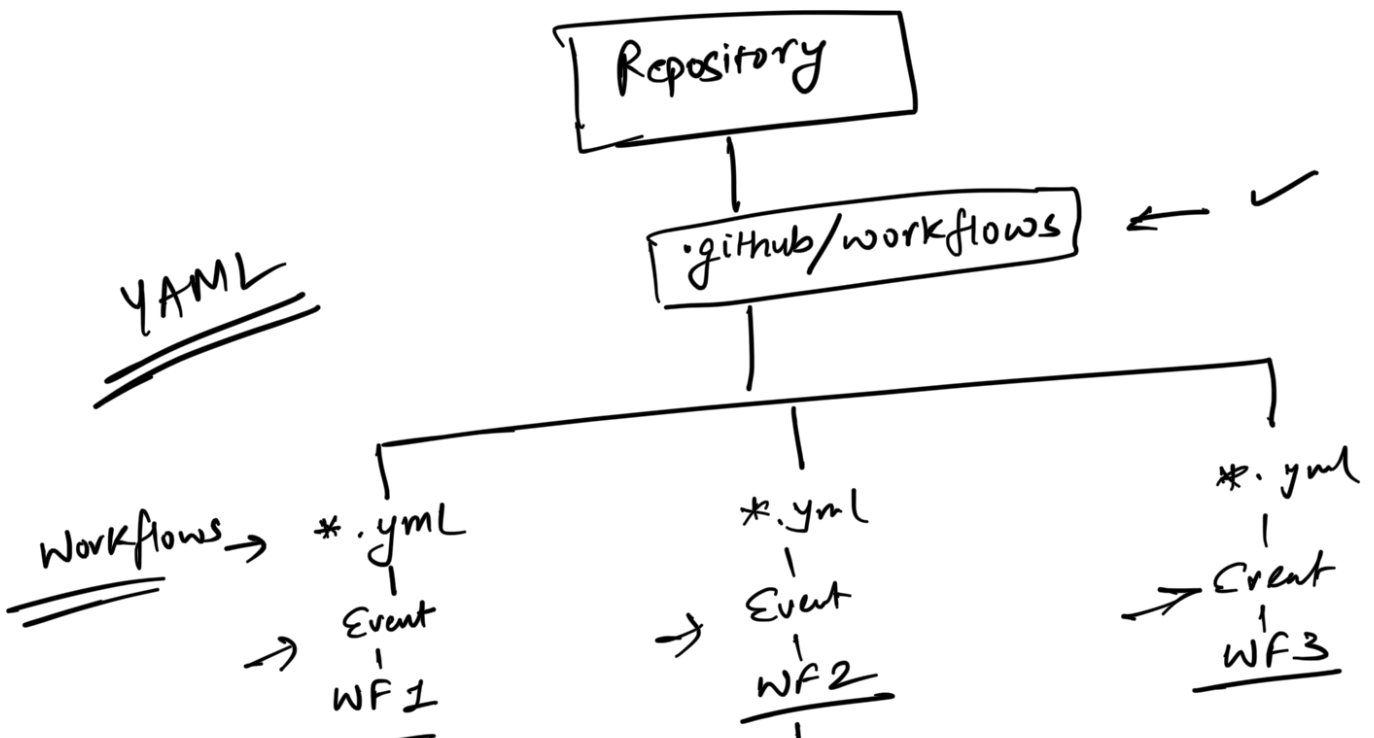

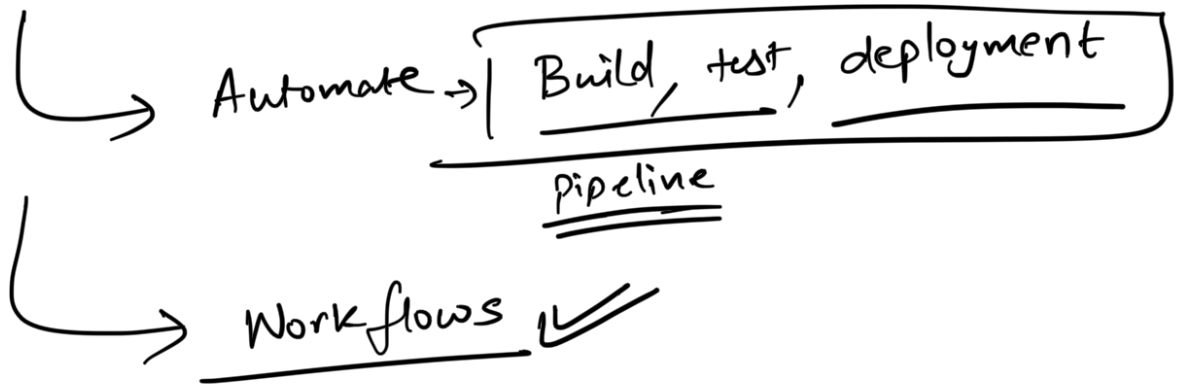

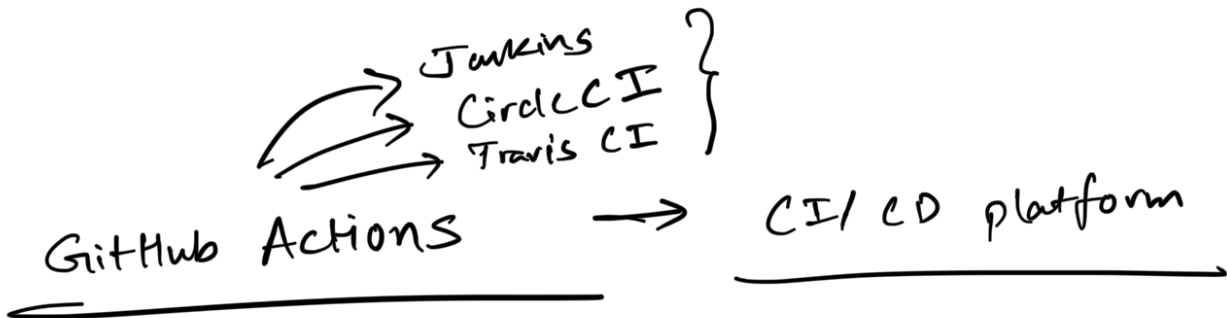

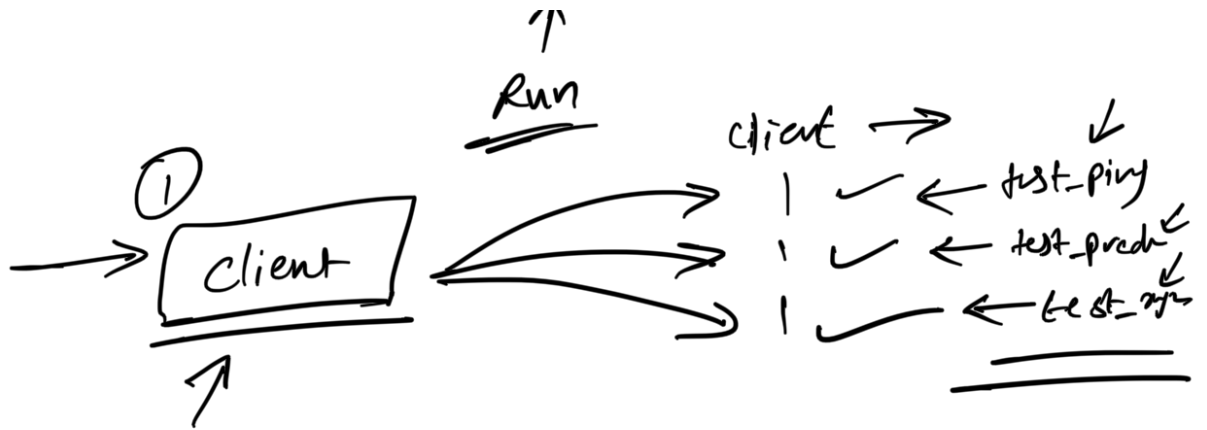

Pytest output in terminal

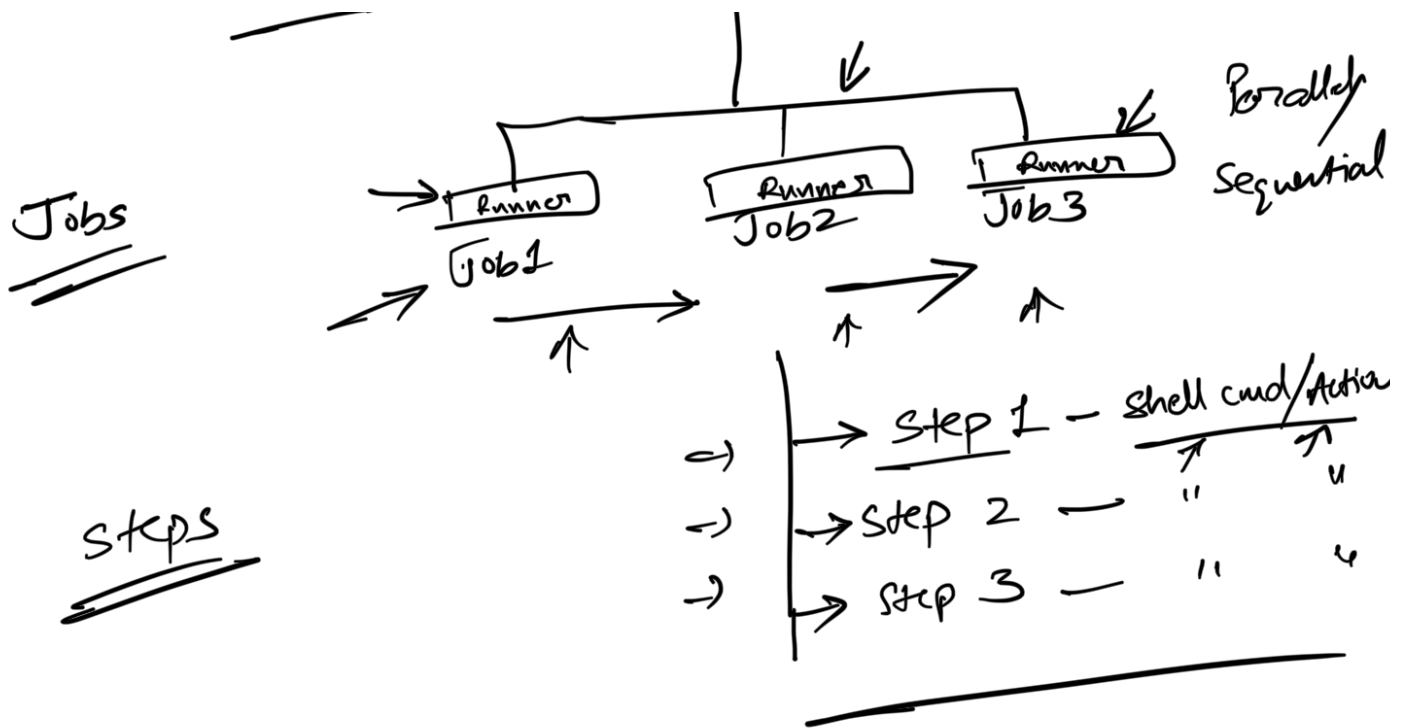

(5) {
① Dot (.) → test passed.
② F → Failed
③ E → Unexpected Exception.

. . F . E
